The instructor will teach live and you will be required to actively participate. You must have web camera and audio capabilities, and your camera must be turned on the entire class time. Access via a smartphone is not allowed.

---

The OSHA #7400 - Noise in the Construction Industry course is designed to increase participant's knowledge and skill in construction noise and provide materials and guidance for training workers on the jobsite. OSHA published an Advanced Notice for Proposed Rulemaking, Hearing Conservation Program for Construction Workers. This course builds on OSHA's efforts to reduce occupational hearing loss in the construction industry. Topics include OSHA Construction Noise Standards, Properties of sound, Noise-induced hearing loss, Noise exposure control, Selection and use of hearing protection, Conducting sound level surveys and Worker training.

By the end of this course, participants will be able to:

- State the properties of sound and its relationship to noise-induced hearing loss
- Properly use hearing protection
- Conduct sound level surveys and requirements for training workers

Language: English

Prerequisites: None

Minimum Class Size: 3

Maximum Class Size: 40

Course Length: 1 day
