**NOTE, BEFORE YOU REGISTER...**

This is a Blended (1/2 online & 1/2 classroom) course. If you are interested in taking the classroom only course, please search for CPR without 'Blended' in the title.

After registering for this class you will receive an email link to the online theory portion.

Links are issued manually and are not issued over weekends/holidays. Please allow up to 48 hours to receive your link.

You must complete the online theory portion prior to coming to the practical test portion.

You will NOT be admitted for your practical test without presenting the online theory completion certificate (completion certificates can be printed and handed in, or emailed ahead of class date to [RMedlin@buildsafe.org](mailto:RMedlin@buildsafe.org))

The Blended Heartsaver First Aid with CPR and AED Training Course is a hybrid course which combines both online learning with a hands-on practical component designed to teach you to effectively recognize and treat adult emergencies in the critical first minutes until emergency medical services personnel arrive. The course provides a complete health and safety solution for First Aid, Adult CPR and AED. The First Aid component of this course prepares students to recognize and react to common situations such as low blood sugar, bleeding, broken bones and sprains, seizures, strokes, insect bites and stings, and temperature related injuries. The CPR and AED component of this course prepares students to recognize the signs of sudden cardiac arrest, when to activate the EMS system, and how to perform CPR. Students will become familiar with an Automatic Electronic Defibrillator (AED) and how to successfully operate an AED in an emergency.

By the end of this course (including both the online and classroom practical), participants will be able to:
