

OSHA #7005 Warehousing And Storage

Start Date: 5/20/2024 7:30 AM

End Date: 5/20/2024 3:30 PM

[Click here for additional date options](#)

This course covers the hazards and injuries likely to occur in public warehousing and storage operations, including encounters with powered industrial trucks, material handling, lifting and ergonomics, hazard communication, walking and working surfaces, and life safety including fire protection and evacuation. This course is intended for warehouse workers, supervisors, and employers responsible for developing safe work practices and procedures in a warehouse setting.

Upon course completion students will have the ability to:

recognize the potential for injuries from forklifts, material handling and lifting,
exposure to hazardous substances,
slips, trips, and falls and methods to control and abate these hazards.

Target Audience: The target audience is the small construction employer, business owner, or manager who would like to obtain information about hazards and injuries that may occur in public warehousing and storage facilities. The training is also suitable for employees and employee representatives.
