

145-Hour Construction Safety

Start Date: 12/6/2022 5:00 PM

End Date: 12/6/2022 8:00 PM

The 145-Hour Construction Safety Administrator Certificate Course is a highly intensive, multi-month course designed by seasoned construction safety and health professionals to help meet industry demands for well-rounded safety administrators.

The course is taught by a variety of engaging instructors, safety experts, and industry professionals, and includes classroom experiences, field trips, the annual safety conference, and more. Over the almost six month program you will learn to initiate and maintain a top-notch safety program, while also earning several hazard awareness cards, first-aid certification, and a course completion certificate.

This course offers many opportunities to network with peers and prominent safety professionals, including the many Thursday night dinners before class, and culminates with a graduation dinner in May.

Course Topics* include:

Physical Hazards

- Fall Protection
- Personal Protective Equipment
- Steel Erection
- Rigging/Materials Handling
- Cutting & Welding Safety
- Crane Inspections
- Managing Mobile Crane Hazard Awareness
- Excavation Hazard Awareness
