

# OSHA #2055 - Cranes in Construction

**Start Date: 5/21/2019 7:30 AM**

**End Date: 5/23/2019 4:00 PM**

[Click here for additional date options](#)

The OSHA #2055 Cranes in Construction course covers the best practices in crane and derrick operation using the OSHA Cranes and Derricks in Construction Rule as a guide. Course topics include hazards associated with crane assembly and disassembly, types of cranes, lifting concepts, rigging and wire rope, signaling, employee qualifications and training, and maintenance, repair, and inspection requirements. Students will participate in workshops to reinforce concepts of safe crane operation.

Upon course completion students will have the ability to

- Identify the types of cranes and their components and attachments,
- Determine safe operating conditions
- Recognize common violations of OSHA Standards

Language: English

Prerequisites : None
